D2p1

1
00:00:05,180 --> 00:00:08,260
[Interviewer]: Okay, so for the first task, how did you proceed?

2
00:00:12,740 --> 00:00:45,180
[Participant]: Yeah, I was reading the scenes and I was trying out how to move the character and what was possible and what not. And I tried to do the best to just pose the character as good as I can. and the scene, I just described what I thought the surroundings would look like.

3
00:00:50,880 --> 00:00:59,220
[Interviewer]: Just a question. You didn't exactly follow the shot that was in the task. Was that your decision or did you just forget about it?

6
00:01:00,100 --> 00:01:04,060
[Participant]: Did I not? I don't really remember, to be honest.

7
00:01:07,680 --> 00:01:17,360
[Interviewer]: Don't worry. And for the second task, how did you proceed?

8
00:01:21,940 --> 00:02:19,600
[Participant]: So I see. I think I tried to split up the scene in multiple different scenes or frames so I can think about how many frames I need for the task. And then I did multiple frames for every section I made up in my head. And yeah, it was kind of hard to move the character the right way for some movements. And the AI generates a bit weirdly sometimes. But yeah, I wanted to show the movements with multiple frames and it did work fine, I guess, for some part.

9
00:02:20,860 --> 00:02:29,560
[Interviewer]: Did you think of the... Like how many frames you wanted to do beforehand or while you were going?

10
00:02:29,980 --> 00:02:35,000
[Participant]: I was thinking about it before, but I think I adapted later on.

11
00:02:37,820 --> 00:02:58,080

[Interviewer]: Okay. And... On a scale from one to seven. One being negative and seven positive. How did you like the physical posing feature?

12
00:03:06,440 --> 00:03:08,780
[Participant]: How I like the feature or how well it worked?

13
00:03:09,500 --> 00:03:12,380
[Interviewer]: Like both, in combination. And you can also say why.

14
00:03:14,360 --> 00:03:40,340
[Participant]: I think I would say four, because I think it's a cool feature and it was fun to do, but the character is kind of... Or the model is kind of hard to move around. For example, in this scene, you have to... Yeah. In this guy, he puts his knees to his chest. This is something I can't really do with the figure, so that's kind of annoying. Okay.

15
00:03:40,600 --> 00:03:42,220
[Interviewer]: Well, I don't know why it's probably...

16
00:03:42,260 --> 00:03:43,660
[Participant]: Yeah, that's okay.

17
00:03:43,700 --> 00:03:59,220
[Interviewer]: So were there moments where the mannequin changed your original idea?

18
00:04:06,800 --> 00:04:17,980
[Participant]: So I had to adapt because of the figure, because it was not that perfect, but yeah, not a lot.

19
00:04:19,140 --> 00:04:29,060
[Interviewer]: Okay. And on a scale from 1 to 7, 1 being negative again, how much did you feel in control of the result?

20
00:04:37,640 --> 00:05:05,400
[Participant]: I think a 4, because I could move the character kind of well, but also the generation was sometimes... A bit weird because it didn't generate the things that I wanted it to generate

and I had to remove certain words like skyline, for example. Otherwise it wouldn't generate what I wanted it to.

21
00:05:07,860 --> 00:05:12,040
[Interviewer]: Was that for the character or the background or both?

22
00:05:12,820 --> 00:05:22,940
[Participant]: Yeah, both. Like the generation and what words I used was sometimes a bit annoying, but both is like a 4, so that's fine.

23
00:05:25,540 --> 00:05:47,500
[Interviewer]: Okay. Yeah, so you already said the mannequin, how it influenced that rating was because you were... You had to adapt to how the character could move and also how the AI used the information of the pose. you did, right?

24
00:05:47,720 --> 00:05:47,920
[Participant]: Yeah.

25
00:05:48,360 --> 00:05:54,420
[Interviewer]: And then on a scale from 1 to 7, how satisfied are you with the results?

26
00:05:56,100 --> 00:05:56,500
[Participant]: I think 5.

27
00:06:10,380 --> 00:06:10,620
[Interviewer]: Okay. Why?

28
00:06:12,280 --> 00:07:00,340
[Participant]: I think you... If you only see like the frames, you can understand what's happening, kind of. But it's also not perfect and the scene is a bit more complex than my final product, but I'm still satisfied because it's not that far from what I wanted it to do. So it did work and it didn't do anything that crazy. I'm also not that annoyed of that one frame where he does the back and everything because, the movement is still weird and sometimes in movies you do have some frames that are also... Or in animation, you have frames that are also a bit weird, so it's not that big of a problem, I think.

29
00:07:00,380 --> 00:07:05,720
[Interviewer]: Okay. Did you face any challenges? Yeah. So the mannequin, how to move it, that was a bit of a challenge, but I think that's all. Okay. It mushrooms a bit.

30
00:07:05,760 --> 00:07:18,160
[Participant]: Yeah. So the mannequin, how to move it, that was a bit of a challenge, but I think that's all.

[Interviewer]: Okay. Perfect. That's the first.

D2p1.2

1
00:00:08,300 --> 00:00:13,340
[Interviewer]: Were there moments where the mannequin changed your original idea in this last task?

2
00:00:16,700 --> 00:00:23,160
[Participant]: No, I don't think so, because I already knew the limitations and I didn't even think of things that I couldn't do with it.

3
00:00:29,260 --> 00:00:42,460
[Interviewer]: How did the physical interaction influence your creative expression? Like you already said, with the limitations. Is there anything else?

4
00:00:45,340 --> 00:01:00,840
[Participant]: No, I think that's just that I knew about the limitations and so I had to adapt to it. That's why I couldn't think of it freely, I guess.

5
00:01:08,440 --> 00:01:18,640
[Interviewer]: And just a couple more. On a scale from 1 to 7, how much do you feel like the author of this storyboard?

6
00:01:18,680 --> 00:01:38,260
[Participant]: Yeah, I think maybe... Yeah, I think a 4.

7

00:01:43,660 --> 00:01:44,160
[Interviewer]: And why?

8
00:01:46,440 --> 00:02:06,860
[Participant]: Because I did give the prompts and I did place the characters, so I did something, But at the same time, not also... Sometimes it doesn't really look like how I imagined it in my head, so... Yeah, there was a different influence. So I didn't do everything.

9
00:02:06,900 --> 00:02:18,940
[Interviewer]: Okay. You already said that you did place the characters, so did the interaction with the mannequin influence this rating?

10
00:02:20,880 --> 00:02:37,920
[Participant]: Um... Yeah, I think so, but... I think in a positive way. Like, I did like to place the characters in place. Yeah, it was kind of fun because it's just a different approach.

11
00:02:37,960 --> 00:02:55,360
[Interviewer]: And... How would you rate this interaction compared to traditional storyboarding process? Like where you draw it Or you do it with hand?

12
00:02:56,500 --> 00:04:24,920
[Participant]: Mm... ... Probably 4? Yeah, I would say 4 because I think it's a lot slower. So I think if you just draw with hand and... Yeah, draw what you're thinking about right now, that's a lot quicker. And it's probably also a bit more... The result is more what you want it to be, I think. But also it's not that bad to sometimes get different ideas from the generation right here because... Yeah, there are also interesting things that... Maybe I didn't intend to do, but are still like great things. I think the progress would be... Or the process, it would be like a bit faster. That would be way better. So I think I would enjoy it a lot more.

13
00:04:25,780 --> 00:04:28,680
[Interviewer]: You mean the AI...

14
00:04:29,380 --> 00:04:47,020
[Participant]: The AI generation, also like maybe a set camera ...which I don't need to move and stuff. I think that would be... I think the experience would be much more enjoyable than... Because I would have a lot more experiences in a shorter time.

15
00:04:49,020 --> 00:05:00,760
[Interviewer]: Okay, yeah, interesting. And how would you rate this interaction compared to AI-only storyboarding?

16
00:05:01,720 --> 00:05:41,240
[Participant]: Mm... I think I do like this more, especially with the mannequins, because poses with just AI is a bit hard. Maybe if the mannequins would have less limitations in the physical movement it would be a bit better. I think it would be even more better, but I do also like the mannequins. I think it's better than just AI probably, because you can be much more exact with the body parts.

17
00:05:41,320 --> 00:05:55,060
[Interviewer]: Mm-hmm. And for example, if you had... If you digitally could pose the characters?

18
00:05:55,100 --> 00:06:01,220
[Participant]: Oh, I think I also would like that, yeah. Yeah. So... I'd probably prefer that, yeah.

19
00:06:01,260 --> 00:06:41,860
[Interviewer]: And then just do you have any ideas suggestions for the system? You already said a set camera, faster AI, you would prefer a digital manikin. Is there anything else?

20
00:06:41,920 --> 00:06:44,440
[Participant]: No, I think thats all.

[Interviewer]: Okay, do you have any other remarks you want to share?

[Participant] No, I dont think so. I#m fine, yeah

21
00:06:44,500 --> 00:06:51,980
[Interviewer]: Okay, great. Then, that's the main part.
